

8. Can you help Sophie, Norman, and Ezra figure out how many cartons of 100, boxes of 10, and loose apples for these orders?

|        | <b>Order</b>  | <b>cartons of 100</b> | <b>boxes of 10</b> | <b>loose apples</b> |
|--------|---------------|-----------------------|--------------------|---------------------|
| Graham | 364<br>apples |                       |                    |                     |
| Benita | 292<br>apples |                       |                    |                     |
| Maddy  | 87<br>apples  |                       |                    |                     |
| Erik   | 135<br>apples |                       |                    |                     |
