Brook Koester

DANGEROUS

Matthews David wrote that in 1860, British medical journal the *Lancet* estimated that 3,000 women in one year died by fire.

Overalls

I FIGURE that when a man wears overalls he wants to be able to bend, twist or stoop freely without being conscious of them. So I purposely make my Carhartt's extra roomy, and double stitch every seam. The suspender buttons stick as if they were imbedded in concrete. Interlacing suspenders give you shoulder ease you never knew before—and they stay together in the wash, while the first-grade denim cloth I use has a staunch durability that ensures a surprising length of service.
